

2 Mile Dive Site

2 Mile

The most popular of Sodwana's dive sites, 2 Mile is a large reef, measuring just short of 2 km long, and approximately 900m wide. Depths vary between 9m (Pinnacles) and 38+m (Deep Sponge). There are many dive sites scattered within the main body of 2 Mile, and they average out at about 14m-16m. Due to its size, 2 Mile has something for everyone, from massive beds of diverse corals, rocky overhangs & caves, to a massive amount of fishes and weird & wonderful invertebrates.
