

Windmill Beach Dive Site

Windmill Beach :

One of the popular training and first of Cape Town dive sites. It's fairly enchanted, which makes a little haven for marine animals. Full of octopus, little klipfish and nudibranch. Also this is the only site where Pro Divers has sited a 3-meter long stingray. The sandy area leads out to a deep gully on the left side of the reef. Cause Boulders Beach is right next to that, penguins are known to come and have a little investigation to the strangers in their home.

Max Depth 8meters

Shore Dive

False Bay
